

PEJMAN HAMEDANI

- H4B 1N7, Montreal
- Email: pejmanfsd@gmail.com | Tel: (438) 725-1732
- LinkedIn: www.linkedin.com/in/pejman-hamedani
- Portfolio: <https://pejmanfsd2.github.io/portfolio2026.github.io/>
- Github: <https://github.com/PejmanFSD>
- Full Stack Developer with a diploma in Full Stack Development from **John Abbott College** and hands-on experience building web applications using **MERN** and **SERN** technologies.
- Skilled in React.js, Node.js, Express.js, MongoDB, SQL and RESTful API development.
- Experienced collaborating in Agile teams, developing responsive applications and managing full project lifecycles from database design to deployment.
- Passionate about creating scalable web solutions and continuously expanding technical expertise through personal projects and professional development.
- Familiar with the following tools and technologies:
 - > **Front-End:** HTML5, CSS3, JavaScript, React.js, Vue.js, jQuery, EJS, Bootstrap
 - > **Back-End:** Java, PHP, Node.js w/ Express, Python, C# ASP.NET, Java Spring Boot
 - > **Database & Tools:** MySQL, MySQL Workbench, SQLite, Mongo DB, PHPMyAdmin, SMSS, Mongoose
 - > **IDEs:** Eclipse, IntelliJ, NetBeans, PyCharm, VSCode, Sublime
 - > **Tools & Technologies:** Postman, XAMPP, AJAX
 - > **Cloud Services:** AWS(S3, EC2), Docker
 - > **Development Tools:** Agile Methodology, Git/GitHub, Scrum, Trello, Jira, Bitbucket
- Proficient in time management, distinguishing the problems and finding the solutions (debugging)
- Fluent in English, French and Farsi
- Office Software: Word, Excel, Power Point
- Graphic Software: Adobe Photoshop, Adobe Illustrator, Adobe Premier
- Engineering Software: AutoCad, Land, E-Tabs, Safe

Featured Project

Pejman MERN Wonderland | Personal Full-Stack Project:

A full-featured gaming and advertising platform developed over 7 months using the MERN stack. The application combines interactive gaming, user engagement, leaderboard competition, advertising management, and community-driven content within a role-based environment.

Technologies: MongoDB, Express.js, React.js, Node.js, JWT Authentication, Cloudinary, REST APIs, Bootstrap, Git/GitHub.

Key Achievements:

- Sole developer responsible for the architecture, database design, frontend development, backend APIs, testing, deployment, and maintenance of a full-stack web application comprising 50+ React components.
 - Developed 21 interactive games featuring timer-based challenges, intelligent opponent logic, and advanced algorithmic techniques including recursive problem-solving.
 - Designed a gamification-driven advertising system enabling users to earn visibility through leaderboard rankings and platform engagement.
 - Implemented secure authentication, authorization, and role-based access control for Players and Administrators.
 - Built a leaderboard and star-reward system to encourage user engagement and competition.
 - Integrated external APIs and Cloudinary cloud storage for dynamic content and media management.
 - Created a complete ratings and reviews system with moderation capabilities and pagination.
 - Implemented advanced client-side and server-side validation, administrative user-management tools, live search functionality, and responsive cross-browser design.
 - Applied Agile development practices, Git version control, and modern RESTful API architecture throughout the project lifecycle.

Relevant Professional Experiences

Junior Full Stack Developer (Contract)	Interact Health PRO	Jan 2024 - August 2024
➤ Developed and maintained custom, responsive, compatible and cross-browser website application for the admins and the clients using: > Front-End languages (HTML - CSS - JavaScript - Bootstrap - jQuery) > Back-End language (ASP.Net Core - C#) > Database tools (SSMS - SQL) > Teamwork services (Jira - GitHub - Slack) > Deploying process (AWS) ➤ Collaborated with senior developers and designers in an Agile environment. ➤ Designed and optimized database structures using SQL Server. ➤ Participated in application deployment and maintenance on AWS. ➤ Mentored newly onboarded developers and assisted with project knowledge transfer. ➤ Contributed to database migration initiatives that improved system maintainability.		

Previous Professional Experiences

➤ Consulting civil engineer of road projects (AutoCAD, LAND, Office Software), Moshara Consulting Company, Iran	2015
➤ Consulting civil engineer of road projects (AutoCAD, LAND, Office Software), Imer Consulting Company, Iran	2014
➤ Executive civil engineer of road projects, Abad-Rahan-Pars Entrepreneur Company, Iran	2013

Education

➤ Full Stack Development Program (A.E.C) - John Abbott College, Montreal	2024
➤ The Web Developer Bootcamp (Udemy)	
➤ The Ultimate MySQL Bootcamp (Udemy)	
➤ The Modern JavaScript Bootcamp Course (Udemy)	
➤ The Git & Github Bootcamp (Udemy)	
➤ The Ultimate Guide To ChatGPT & Midjourney (Udemy)	
➤ Construction Management (Master) - Iran University of Science and Technology, Iran	2018
➤ Civil Engineering (Bachelor) - Iran Azad University, Karaj Branch, Iran	2010

Independent Full Stack Development

2024 – Present:	
➤ Built and maintained personal full-stack applications using MERN and SERN stacks. ➤ Expanded expertise in React.js, Node.js, MongoDB and SQL through hands-on projects. ➤ Completed advanced training in JavaScript, MySQL, Git/GitHub and modern web development. ➤ Developed portfolio projects demonstrating authentication, CRUD operations, REST APIs and responsive design principles.	

Projects of John Abbott College

- **Popify:**
A dynamic webpage, simulated of a music website, developed with a team of 4, responsible for the whole Back-end, Login/Registration page, “admin” page and setting up/Managing Jira.
- **NPM Job Search:**
A dynamic webpage, simulated of a job search website, developed with a team of 3, responsible for Login/Registration, User personal profile page, Reviews, ratings and Validations.
- **5 Star Cinema:**
A dynamic webpage, simulated of a ticketing website, developed with a team of 3, responsible for the “admins” page (Front-end and Back-end).
- **Friends Hotel:**
A single project of a dynamic webpage simulated of a hotel reservation website.
- **Montreal Book Store:**
A single project of a dynamic webpage simulated of a book store website.
- **NPM Bank:**
A dynamic webpage, simulated of a banking website, developed with a team of 3, responsible for the “users” page.
- **Fair Pets Vet:**
A static webpage, simulated of a pet clinic website, developed with a team of 4, responsible for the home page.
